

Children and School Air Quality Safety Guidelines

Document ID: REF-CHI-2024

Source: Pediatric Health Association & School Safety Board

Topic: Protecting Infants, Children, and Students from Air Pollution

Pediatric Risk Factors:

1. Higher Respiratory Rate: Children breathe 50% more air per pound of body weight than adults.
2. Developing Lungs: Inhaled particulates impair pulmonary alveolar development.

School Recess Guidelines:

- AQI 0-50: Full outdoor recess and sports allowed.
- AQI 51-100: Normal outdoor activity; observe asthmatic children closely.
- AQI 101-150: Limit prolonged outdoor exertion to 15 minutes; asthmatic children stay indoors.
- AQI 151-200: Move all recess, PE classes, and after-school sports indoors.
- AQI > 200: Full outdoor activity cancellation; activate classroom HEPA purifiers.
