

Elderly and Cardiovascular Health Safety Protocol

Document ID: REF-ELD-2024

Source: Geriatric Health Council & Cardiovascular Protection Association

Topic: Air Pollution Precautions for Seniors and Cardiac Patients

Health Considerations:

1. Fine Particulate Matter (PM_{2.5}) penetrates deep into the bloodstream, triggering vascular inflammation and
2. Seniors with hypertension, coronary artery disease, or COPD are at elevated risk during particulate spikes

Safety Recommendations:

- Monitor daily local AQI and particulate readings prior to outdoor plans.
- When AQI exceeds 100, refrain from outdoor yard work, gardening, or long walks.
- Keep emergency respiratory medication (e.g. quick-relief inhalers) accessible.
- Maintain adequate hydration and remain in air-conditioned, HEPA-filtered indoor environments.
