

Occupational Health Guidance for Outdoor Workers

Document ID: REF-WRK-2024

Source: Occupational Safety & Environmental Health Administration

Topic: Construction, Delivery, Municipal, and Agricultural Worker Safety

Occupational Protection Mandates:

1. Employer Responsibilities: Monitor ambient air quality at job sites hourly when AQI exceeds 100.
2. Respiratory Protection: Provide NIOSH-approved N95 or KN95 respirators free of charge when PM2.5 exceeds 150 µg/m³.
3. Work-Rest Cycles: Implement mandatory 15-minute indoor rest breaks per hour in air-conditioned break areas when AQI exceeds 150.
4. Workload Adjustment: Shift heavy manual labor tasks to early morning hours when ozone and PM levels are lowest.
