

General Public Pollution Precautions & Action Guide

Document ID: REF-PRE-2024

Source: Center for Environmental Health & Protection

Topic: Practical Precautions for Elevated AQI Levels

Recommended Actions by AQI Tier:

1. Moderate (AQI 51-100):
 - Unusually sensitive individuals should consider limiting prolonged outdoor exertion.
2. Unhealthy for Sensitive Groups (AQI 101-150):
 - Children, elderly, and individuals with respiratory conditions should reduce outdoor activity.
 - Wear N95 or KN95 respirators when near heavy traffic corridors.
3. Unhealthy (AQI 151-200):
 - Avoid prolonged or heavy exertion outdoors.
 - Keep windows closed and run indoor air purifiers with HEPA filtration.
 - Reschedule outdoor athletic events to early morning or indoor facilities.
4. Very Unhealthy & Hazardous (AQI > 200):
 - Remain indoors with high-efficiency particulate air filtration.
 - Avoid all strenuous physical activity outdoors.
